We are very aware that each customer has their own list of requirements or preferences. As a company, we and our partners work closely with owners and operators to ensure that we deliver a package that suits them.

Please don't hesitate to contact us to discuss your requirements.

12-15 METRES

Based on our highly successful Fast Rescue Daughter Craft and SAR designs, these powerful and stable boats provide the ideal platform for Offshore and Inshore Diving Operations.

The aluminium deep-V planing hull offers excellent sea-keeping characteristics whilst the spacious and light, well equipped superstructure provides room for a crew of up to 8 persons.

Twin diesels and waterjets provide ample power for 30+ knot performance and superb close-quarter manoeuvrability.

QUALITY AND SERVICE SINCE 1938™

Back in the fifties, Brødrene Hukkelberg was the first yard in Norway to begin experimenting with aluminium welding and today, by embracing the newest technology, is still at the leading edge of aluminium boat design in Scandinavia.

Our range of 9-20 metre vessels are exported world-wide, providing end users with boats of immense strength, durability, quality and exceptional handling and performance.

PARTNERSHIPS

Hukkelbergs Boats are very pleased to work closely with leading names in Industry providing the highest possible quality products to compliment our LDC range.

These include Safe Air Diving from Denmark, Vest Davit AS in Norway and Fathom Systems from the UK.
